**JUL 25 2008**

Applicant: Sellner, et al.  
Appl. No.: 10/580,295  
International Filing Date: November 30, 2004  
Title: DELTA-AMINO-GAMMA-HYDROXY-OMEGA-ARYL-ALKANOIC ACID AMIDES  
AMD USE AS RENIN INHIBITORS  
Attorney Docket No.: 33592-US-PCT  
Pub. No.: 2007/0142475 A1  
Pub. Date: June 21, 2007

This is a decision on the request for corrected of patent application publication under 37 CFR 1.221(b), received on August 21, 2007, for the above-identified application.

The request is DISMISSED.

Applicant requests that the application be republished because the patent application publication contains a material error in claim 6 wherein "(1S, 2S, 4S)-2-amino" is misprinted as "1S, 2S, 452-amino".

37 CFR 1.221(b) is applicable "only when the Office makes a material mistake which is apparent from Office records. Any request for a corrected or revised patent application publication other than as provided in paragraph (a) of this section must be filed within two months from the date of the patent application publication. This period is not extendable." A material mistake must affect the public's ability to appreciate the technical disclosure of the patent application publication, to determine the scope of the patent application publication, or to determine the scope of the provisional rights that an applicant may seek to enforce upon issuance of a patent.<sup>1</sup>

The error in claim 6 wherein "(1S, 2S, 4S)-2-amino" is misprinted as "1S, 2S, 452-amino" is not a material Office error under 37 CFR 1.221. The text of the amendment filed on 5/23/06 is very small and not very legible.

Applicant is advised that he may want to file application papers that are clearer, as the error is due to the quality of the text. The text is small, which makes it difficult to read and to electronically reproduce by digital imaging and optical character recognition. Applicants have been advised to file applications having cleaner and larger text with sufficient clarity and contrast

<sup>1</sup>Changes to Implement Eighteen-Month Publication of Patent Applications, 65 FR 57023, 57038 (Sept. 20, 2000), 1239, Off. Gaz. Pat. Office Notices 63, 75 (Oct. 10, 2000) (final rule).

to permit reproduction, such as electronic reproduction by digital imaging and optical character recognition, which will avoid errors in the patent application publication process. See 37 CFR 1.52.

Applicants are advised that a "request for republication of an application previously published" may be filed under 37 CFR 1.221(a). Such a request for republication "must include a copy of the application in compliance with the Office electronic filing system requirements and be accompanied by the publication fee set forth in § 1.18(d) and the processing fee set forth in § 1.17(i)." If the request for republication does not comply with the electronic filing system requirements, the republication will not take place and the publication fee set forth in § 1.18(d) will be refunded. The processing fee will be retained.

Any request for republication under 37 CFR 1.221(a) must be submitted via the EFS system as a "Pre-Grant Publication" and any questions or request for reconsideration of the decision should be addressed as follows:
